Cyren Threat InDepth

Contextualized, Actionable Threat Intelligence Helping Enterprises Tackle New Security Threats

Overwhelmed security teams are constantly engaged in a battle to protect their enterprise from evolving threats being delivered using innovative tactics, techniques, and procedures. Security teams rely on timely threat intelligence to provide actionable insights that help them stay ahead of these threats. Threat intelligence helps security teams to prioritize threats that require immediate attention, resulting in faster threat detection and response. But not all intelligence is created equal. Threat intelligence that doesn't provide the right context can increase a security analyst's workload, resulting in overwhelmed security teams and increased organizational vulnerability.

Cyren Threat InDepth

Cyren Threat InDepth is contextualized, correlated threat intelligence that allows security teams and security executives to gain a comprehensive and multi-dimensional view of evolving threats and make meaningful decisions to combat them. This high-fidelity, actionable intelligence is gathered by analyzing and processing billions of daily transactions across email content, suspicious files, and web traffic to provide unique, timely insights faster than other vendors.

What Makes Threat InDepth Unique

Cyren gathers actionable intelligence by analyzing and processing billions of daily transactions in Cyren GlobalView™ Threat Intelligence cloud. By correlating insights gathered across email content, web traffic, and suspicious files; Cyren provides security teams with a multi-dimensional presentation of critical threat characteristics.
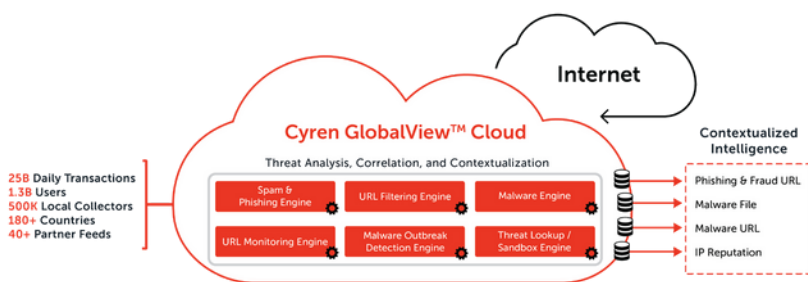

Powered by GlobalView, Cyren Threat InDepth's contextualized threat intelligence allows enterprise security teams to gain unique visibility into evolving threats and rapidly make decisions to combat them.

Benefits for SOC Teams

• Reduce Mean Time to Detect (MTTD) and Mean Time to Respond (MTTR)
• Correlated, contextualized insights for smart and rapid decision-making
• High-fidelity threat intelligence with minimal false positives
• Improve detection effectiveness and efficiency

Benefits for Security Executives

• Understand the impact of evolving threats on your organization
• Reduce organizational risk while maintaining business continuity and productivity
• Improve accuracy and speed of threat detection and response
• Gain higher-value from current security investments

Benefits of Threat InDepth

• **Access to world's largest threat intelligence cloud -** Unparalleled visibility into evolving attacks
• **Fast, correlated, and contextual intelligence –** Helps reduce MTTD and MTTR
• **High-fidelity threat intelligence -** Improved detection effectiveness and efficiency
• **Comprehensive, multi-dimensional presentation of critical threat characteristics -** Helps understand the evolving threat landscape
