DATA443™

Gartner.

> *Here's what the analysts say:*
>
> *Gartner's Top Trends for Privacy through 2024 emerge from a collision between the increased use of personal data and the accelerated evolution of data protection regulation. The subsequent shockwave has pushed regulatory expansion, both in terms of depth and geography, on a continuous basis since the General Data Protection Regulation (GDPR) came into effect in May 2018.*
> *The trends in this research focus on organizational challenges in protecting personal data and meeting regulatory requirements for data handling, as well as the reasonable privacy expectations of data subjects. The pandemic response has given life to hybrid everything and accelerated the transition of business processes to the cloud. Concurrently, regulatory expansion in privacy has reached China and India and is diligently making its way through the U.S., state by state...*
>
> *By Nader Henein, Bart Willemsen, Bernard Woo – Source*

Data443's position on GDPR capabilities

Data443's Data Identification Manager is tailored to address the challenges posed by GDPR and the evolving privacy landscape. This tool focuses on the protection of personal data and compliance with regulatory requirements, ensuring organizations meet both the letter and spirit of GDPR. It offers robust capabilities for identifying, classifying, and managing personal data, which are crucial for responding to data subject requests and maintaining privacy standards.

Data Identification Manager is particularly effective in cloud-based and hybrid environments, a critical aspect in today's accelerated digital transformation. Its comprehensive approach to data governance, including the management of diverse data types across various platforms, aligns with the need for adaptable solutions in a globally expanding regulatory environment. This makes it a valuable asset for organizations seeking to navigate the complexities of GDPR compliance while upholding high standards of data privacy and protection.
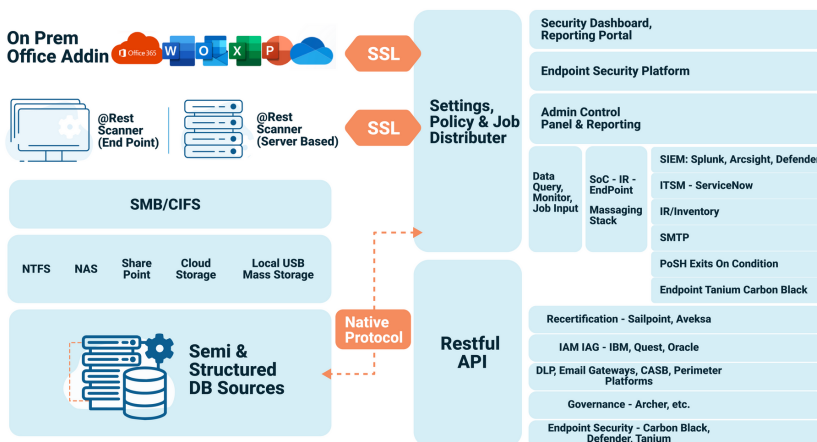

Features and Modules

The features of Data Identification Manager™ are:

› **Dynamic Data Classification:**
Real-time categorization of data based on changing attributes or characteristics.

› **Trainable ML Libraries:**
Machine learning libraries that adapt and learn from data patterns for improved classification and analysis.

› **Data Migration:**
Transfer of data between different systems or storage environments.

› **Data Loss Prevention:**
Measures to prevent unauthorized access, use, or transmission of sensitive data.

› **Email Archiving:**
Efficiently manage archiving for virtually any volume of email from a wide variety of datasets, including Microsoft OneDrive and SharePoint, and Google Workspace.

› **Comprehensive Data Archiving:**
Thorough and inclusive storage of various data types.

› **Scalability:**
Accommodate growing data volumes and changing business needs like M&A, and growing number of legacy platforms.

› **Centralized Management:**
Unified control and administration of data identification and management processes.

› **Audit Trails and Reporting:**
Access audit trails and reporting functionality to track and report on data access and usage.

› **Cloud-deployed:**
Deployment of the solution on cloud-based infrastructure for accessibility and flexibility.

› **Defensible Disposition:**
Secure and documented disposal or deletion of data in compliance with regulations.

› **Enhanced Connectivity:**
Improved integration and connections with diverse data sources or systems.

› **Policy Enforcement:**
Implementing and ensuring adherence to data handling policies and regulations.

› **Redundancy Detection:**
Identification and handling of duplicate or redundant data within the system.

› **File Analysis:**
Examination and understanding of the contents and attributes of files for various purposes.

› **Risk Assessment:**
Evaluation of potential threats or vulnerabilities related to data handling or storage.

Company Overview

OneTrust is a global provider of privacy management software, offering tools aimed at aiding enterprises in complying with data privacy regulations like GDPR, CCPA, and LGPD. Its platform focuses on risk identification, consent management, assessment execution, and process automation, targeting compliance with evolving data privacy regulations.

Integrations

The integrations of OneTrust's Trust Intelligence Platform are:
- CRM Integrations
- CMS Integrations
- API Integrations
- ITSM Integrations
- HR Systems Integrations
- ERP Integrations
- ALTR
- Amazon API Gateway
- Amazon Athena
- Amazon Dynamo DB
- Amazon RDS
- Amazon Redshift
- Apache Hive
- Apigee
- Auth0
- BitSight
- BMC and many more

Supported Systems

OneTrust's Trust Intelligence Platform modules can be accessed through web-based applications and interfaces such as:
- Google Chrome
- Mozilla Firefox
- Safari
- Others

Company Overview

BigID is a data security, privacy, compliance, and governance leader, enabling enterprises to proactively discover, manage, secure, and extract more value from their data in a single platform for data visibility and management. Customers rely on BigID to decrease data risk, automate security and privacy controls, accomplish compliance, and better understand their data across their whole data environment.

Integrations

The integrations of BigID Data Intelligence Platform are:
- Amazon Web Services (AWS)
- IBM Security
- WIZ
- Microsoft
- SalesForce
- SAP
- Tableau
- Tanium
- Google Cloud
- RSA
- ServiceNow
- Solidatus
- Thales

Company Overview

ManageEngine offers the industry's most comprehensive portfolio of IT management tools. ManageEngine is Zoho Corporation's enterprise IT management subsidiary. The firm provides over 60 enterprise IT management products and over 60 free tools for identity and access management, enterprise service management, unified endpoint management and security, IT operations management, security information and event management, advanced IT analytics, and low-code app development.

Integrations

The integrations of the products of ManageEngine are:
- ServiceDesk Plus
- ServiceNow
- Zendesk
- ServiceDesk Plus Cloud
- Jira
- Freshservice
- ADSelfService Plus
- PAM360
- Syslog
- Splunk
- Power BI
- Rapid7
