

## Gartner

### Here's what the analysts say:

*Managed File Transfer (MFT) – Enables the transfer of files between systems or between companies in a reliable and auditable manner. Common features include high-throughput data transfer (including automatic compression), checkpoint restart (to resume file transfer after a connection has been interrupted), and security features such as encryption. File transfers can be initiated via a scheduler, a UI, or via file watchers that monitor a file system or via APIs.*

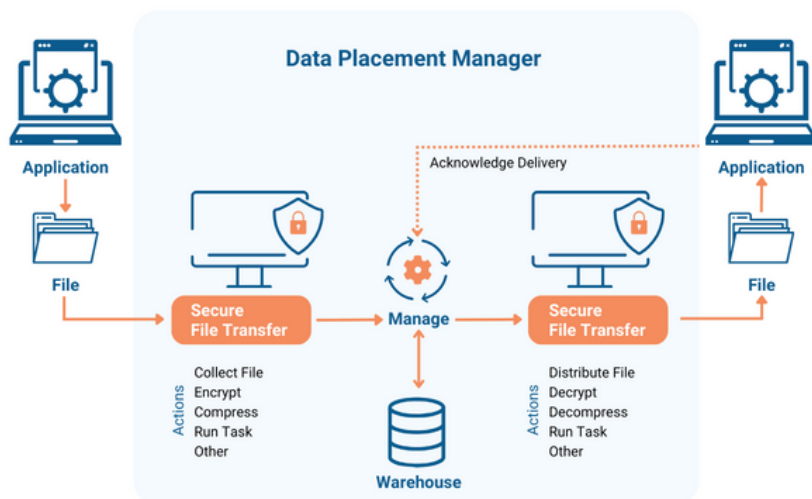

By Benoit Lheureux, Keith Guttridge – [Source](#)

## Data443's position on MFT/EFT capabilities

Data443's Data Placement Manager (DPM) is an efficient solution for transferring business data across networks like the Internet and Intranet. Its web-based setup simplifies remote management, making it an accessible option for businesses needing reliable data transfer without complex installations.

DPM ensures security using FTP Server Security protocols, focusing on user authentication, which adds a layer of protection beyond standard operating system security. It employs virtual directory paths linked to transmission definitions to prevent unauthorized disk access, securing data during transfer. Supporting SFTP and FTP with SSL/TLS, DPM uses encrypted channels for file transfers, meeting high encryption standards. Its ability to manage both scheduled and unscheduled transmissions offers flexibility, crucial for businesses needing adaptable and secure data transfer solutions.

Some of the world's largest financial institutions have relied on Data443's DPM for over 20 years, accomplishing a 6+ 'nines' in service available for over 20 years.

## Features and Modules

The features of Data Placement Manager™ are:

- › **Secure Managed File Transfer:**  
Enables secure scheduling, routing, formatting, and transfer of business-critical data over public and private networks.
- › **Cross-Platform Support:**  
Available on various platforms, including Windows, UNIX, Linux, and OSX, facilitating mission-critical data transmission.
- › **Legacy Systems Integration:**  
Links legacy systems with modern technology trends, supporting diverse transmission needs across multiple protocols.
- › **Compliance Maintenance:**  
Ensures compliance with industry standards, such as HIPAA for the Healthcare Industry and sensitive credit data handling for Financial Services.
- › **Operational Efficiency:**  
Improves operational efficiency by providing centralized control over enterprise file movement operations.
- › **Customization and Scalability:**  
Offers customization options and scalability to adapt to changing business needs.
- › **Data Security:**  
Prioritizes data security with features for encryption, validation services, and secure transfer, providing peace of mind for sensitive data handling.
- › **24/7 Customer Support:**  
Provides continuous customer support, ensuring assistance is available whenever needed.
- › **Various Industries Commitment:**  
Demonstrates a powerful commitment to customers, particularly in industries such as Healthcare and Financial Services, emphasizing adaptability, predictability, scalability, and security.
- › **Secure FTP Server:**  
DPM offers FTP/S (with Auth-TLS) and SFTP. "A secure FTP server helps users with transferring files over secure file transfer protocols such as SSH File Transfer Protocol or FTP with SSL/TLS."
- › **End-to-End Encryption:**  
DPM offers FTP/S and SFTP, both encrypt the transport channels. DPM also offers encryption of data before transport. (unclear what this is referring to)
- › **Task Automation:**  
DPM jobs automate the process, including initiating tasks on remote servers.
- › **Eliminates Custom Programming:**  
This is key to DPM jobs.
- › **Auditing:**  
DPM audits all UI updates and records all steps within Job processing.
- › **Reporting:**  
DPM includes both canned reports and SQL reporting via the UI.
- › **Two-Factor Authentication:**  
HTTP server offers 2FA authentication, SFTP server offers Publickey Authentication.
- › **Visibility and Control:**  
DPM Console provides a real-time view of all activity.
- › **DMZ Proxy Gateway:**  
DPM offers a Secure Gateway Host Key Support: This is SFTP Host Keys.
- › **Virtual Folders:**  
DPM supports optional virtual file systems.
- › **Account Controls:**  
DPM Operator security includes Role and job visibility controls.

## Company Overview

Progress Software Corporation specializes in developing business application software. Progress focuses on solutions that enable businesses to build, deploy, and manage applications with an emphasis on security, aiming to contribute to business growth and success. Progress has many unrelated product lines and has unfortunately had its MOVEit product line suffer a large vulnerability which has affected many customers.

## Integrations

The list of integrations of Progress Software's WS\_FTP Server and MOVEit Transfer are:

- › Oracle
- › Salesforce
- › ServiceNow
- › Azure
- › WordPress
- › AWS
- › Snowflake
- › OpenEdge
- › Others

## Supported Systems

Progress Software's WS\_FTP Server and MOVEit Transfer supports some of the operating systems such as:

- › Windows Server 2003 (x64 Edition, Telerik, Ipswitch, Chef, Kemp, Flowmon)
- › SQL Server 2008 R2: Supported systems matrix for SQL Server 2008
- › Windows XP Professional x64 Edition
- › Windows 98, Windows 2000, Windows Me, Windows NT, Windows XP, and Windows Server 2003 (32-bit)

## Company Overview

GoAnywhere is another product that has been combined with the existing, sometimes overlapping product line at Forta (Helpsystems/Global. The product of many acquisitions and change of hands, GoAnywhere customers have been subjected to several large-scale vulnerabilities. The company continues to subject their clients to poor remediation, communications and reparations. The depth and scale of the impacts of these vulnerabilities continue to be played out in the public arena. Many companies have already produced breach notifications due to their usage of the GoAnywhere MFT product line.

## Integrations

The list of integrations of HelpSystems Managed File Transfer are:

- › AWS
- › Automate Plus Cloud Connector
- › Salesforce Cloud Connector
- › GoAnywhere Command Connector
- › ServiceNow Cloud Connector
- › Others

## Supported Systems

GoAnywhere by HelpSystems Managed File Transfer supports some of the operating systems such as:

- › Windows Server 2012, 2016, and 2019
- › Windows 8 and 10
- › Linux (Red Hat, SUSE, Ubuntu, CentOS, etc.)
- › UNIX
- › AIX for IBM Power Systems
- › HP-UX, Mac OS X, Solaris
- › Apple and Android devices

## Company Overview

Another overlapping acquisition for Forta/Helpsystems – Globalscape GoAnywhere is widely used and deployed. Adding onto Forta’s deployments resulting in large scale vulnerabilities, Globalscape is no different. Worse off than their other zero-day exposures from GlobalScape, Forta’s overall customer base continue to learn about ongoing breaches of their data directly, or via data transfer partners. Unfortunately news of more breached customers continue to be published.

## Integrations

**The list of integrations of Globalscape's Managed File Transfer are:**

- › Active Directory
- › SharePoint
- › Microsoft Excel
- › SQL Server
- › Data inspection and redaction

## Supported Systems

**Globalscape's Managed File Transfer supports some of the operating systems such as:**

- › Windows Server 2016
- › Windows Server 2012 R2
